

Child Support

Child support is usually determined based on the payer's gross income. For example, if you work 40 hours per week and earn \$20.00 per hour, then your income on a monthly basis is \$3,467. Child support for one child is calculated at 17% or \$589; for two children is calculated at 25% or \$866; or for three children is calculated at 29% or \$1,005.
